

2020 LSSS 2021

LIFE SCIENCES SEMINAR SERIES

08.09.2020 Xavier Trepat

Mechanics of intestinal organoids

22.09.2020 Mary Gehring

Insights into seed development and imprinting through single-nucleus analyses

03.11.2020 Keren Kinneret

Collective effects in cell migration and in morphogenesis

10.11.2020 Hopi Hoekstra

TBA

15.12.2020 Gisella Caccone

Evolutionary and conservation genetics of giant Galapagos tortoises

02.02.2021 Daniel Riveline

Collective effects in cell migration and in morphogenesis

23.03.2021 Alpha Yap

Adherens junctions: monitoring force for epithelial homeostasis

27.04.2021 Mikhail Savitski

Protein stability in drug discovery and molecular biology

11.05.2021 Ben Black

Epigenetic, genetic, and sex-specific facets of centromere identity and strength

18.05.2021 Helen Saibil

Protein misfolding, aggregation and disaggregation in vitro and in vivo

25.05.2021 Siobhan Brady

Innovation, conservation and repurposing of gene function in plant root cell type development
